### **DETAILED ACTION**

In the amendment filed on 04/25/08, the following have occurred: claims 1, 4-6, 8 and 11-13 have been amended, claims 2, 3, 9 and 10 have been cancelled and claims 1, 4-8, 11-14, 16 and 17 are currently pending.

#### ***Response to Arguments***

Applicant's arguments, filed on 04/25/08, with respect to claims 1, 4-8, 11-14, 16 and 17 have been fully considered and are persuasive. The previous art rejections in the office action dated 01/25/08 have been withdrawn. Claims 1, 4-8, 11-14, 16 and 17 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. §101, and 35 U.S.C. 112, second paragraph, set forth in this office action.

#### ***Claim Rejections - 35 USC §101***

1. 35 U.S.C. §101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1, 4-7 are rejected under 35 U.S.C. §101 because the claimed invention is directed to non-statutory subject matter.

3. Based on Supreme Court precedent (*Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780, 787-88 (1876)) and recent Federal Circuit decisions, §101 process must (1) be tied to another statutory class (such as a particular apparatus) or (2) transform underlying subject matter (such as an article or

materials) to a different state or thing (the Supreme Court recognized that this test is not necessarily fixed or permanent and may evolve with technological advances. *Gottschalk v. Benson*, 409 U.S. 63, 71 (1972)).

4. If neither of these requirements is met by the claim(s), the method is not a patent eligible process under 35 U.S.C. §101.

5. In this particular case, regarding the first test, in performing the steps of the claimed subject matter, there is no requirement that a machine be used, thus the claims are not considered sufficiently tied to another statutory class. Regarding the second test, since the claimed subject matter may be performed using only human intelligence, the steps do not sufficiently transform the underlying subject matter to be statutory. Thus, to qualify as a 101 statutory method, the claim should positively recite the other statutory class (the thing or product) to which it is tied. For example, in the present situation, a 101 statutory method claim would be recited as follow: determining **with a processor** an allowable range of parameters.....Note that in this example, the determining method step is sufficiently tied to another statutory class, **a processor**.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1, 4-8, 11-14, 16 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The independent claims 1 and 8 recite "wherein the winning agents are sellers and buyers are matched to one another." The examiner understands that both sellers and the buyers can be winning agents. However, it is not clear to the examiner how the winning agents are matched to one another. Fig 2 of applicant's disclosure states that agents submit bids and asks to the exchange. And, at the exchange, the submitted bids and asks are matched. Thus, it is not clear to the examiner if it is the winning agents that are matched to one another or if it is the regular agents that are matched. Appropriate correction is required.
